2024

SOUTH BARITO KAPUAS, CENTRAL KALIMANTAN
PROJECT GENESIS

PROJECT MAP

Surrounded by **10 village** communities with **15000 people**, all of the habitants live in harmony and preserve the South Barito Kapuas natural charm.

With abundant potential, Project Genesis aims to reduce over 1.1 million tonnes of CO₂ emissions annually

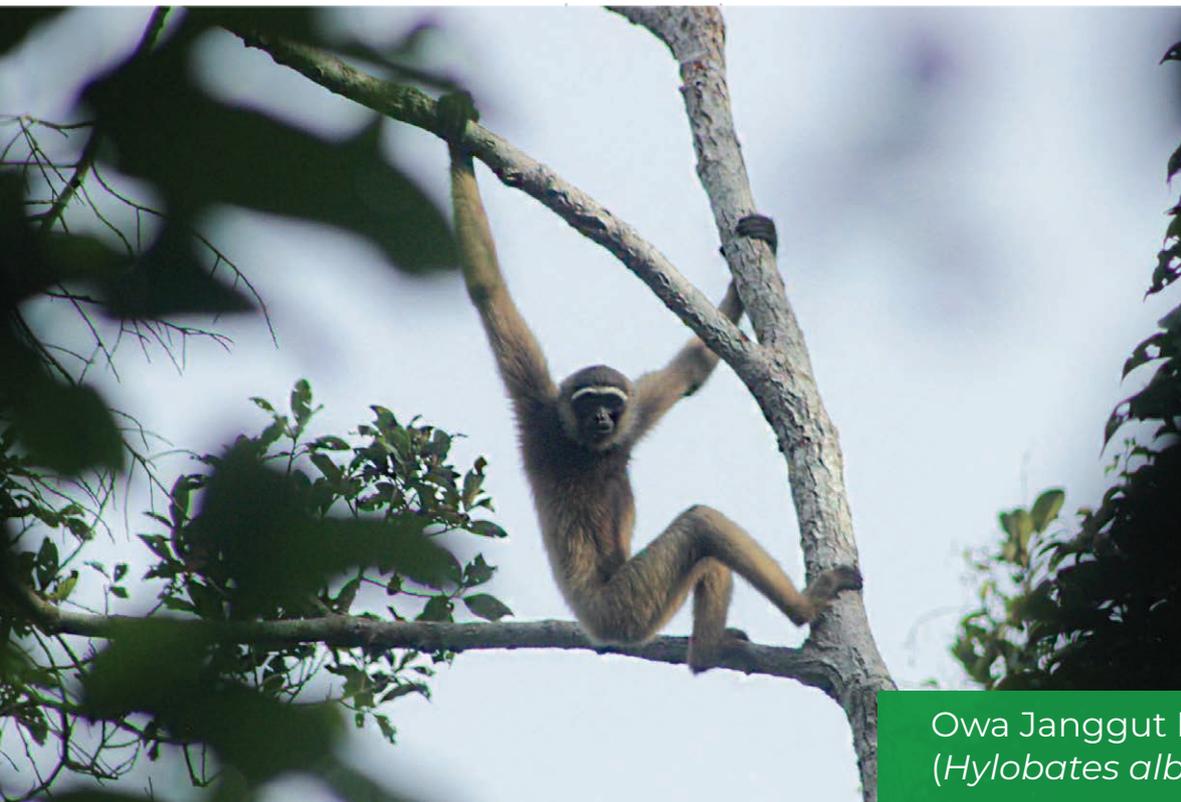

Macan Dahan Kalimantan
(*Neofelis diardi borneensis*)
Bornean Clouded Leopard

A harmonious forest,
sheltering diverse species.

Sarang Orang Utan
(*Pongo pygmaeus*)

Owa Janggut Putih
(*Hylobates albibarbis*)

Where biodiversity flourishes,
and communities thrive in
harmony with nature.

Kantong Semar
(*Nepenthes ampullaria*)
Pitcher Plant

We forge powerful connections between climate action, community empowerment, and biodiversity preservation, creating a harmonious ecosystem for a sustainable future.

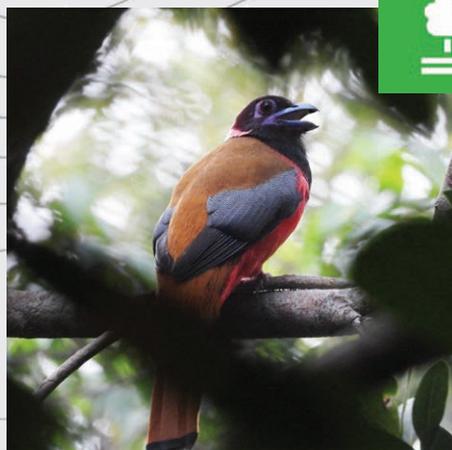

Our groundbreaking project is on a quest to breathe new life into these vital ecosystems.

In the heart of a historically challenged region, we're writing a new chapter of hope and resilience.

While also supporting Sustainable Development Goals
